

## Information to Consumers on Product Safety

Loro Piana is committed to ensuring the safety of its products and safeguarding the health of its customers. As a consequence, the company will share the measures it has adopted to ensure that its items are safe.

In view of the above, the merchandise is subject to:

**1. Risk assessment**, an evaluation is performed in relation to the hazards associated with the goods, taking into account:

- **Chemical risks:** the materials used are tested and monitored to ensure the absence of harmful substances.
- **Physical and mechanical risks:** the products are analysed to identify potential dangers.
- **Process risks:** the manufacturing procedures are set up to minimise any pitfalls arising from operational practices.

**2. Risk control**, each identified loss potential has been eliminated or reduced through:

- **Laboratory Testing:** our products are subjected to laboratory risk assessment tools for compliance.
- **Detailed internal procedures:** quality control procedures are in place in order to guarantee safety at every stage of production.
- **Choice of suppliers:** raw material suppliers are selected on the basis of the competence and ability to comply with the standards relating to applicable safety regulations.

**3. Transparency and accountability:** we provide clear information about our processes and the company is available to respond to queries governing the subject.

**4. Continuous commitment:** we are committed to constantly enhancing our safety standards and stay up-to-date on evolving regulations.
